Cheap Toys

UNTIL DEC. 31st.

If you forgot your Children and Friends at Xmas, remember them for the New Year.

Wishing you all a Bright and Prosperous New Year.

C. W. ROSSELL.

The L. Freifeld Departmental Store

Takes this opportunity to thank its many patrons for their splendid co-operation in helping to build up our business, and wishes all a New Year of Health and Prosperity.

A MODERN SANTA CLAUS

THE world is getting so big and there are so many little folks and big folks in it who look forward to a visit from Santa Claus, all on the same day, that the genial old gentleman is forced by the pressure of his duties to discard his reindeer and his sleigh on occasions and to travel on the fast passenger trains that are speeding people home for Christmas Day. Nothing but the very best will do Santa Claus, and that

is why, as you see here, he has chosen as his steed one of the huge locomotives of the Canadian National Railways. These locomotives, known as the 6000 type, are the biggest passenger locomotives in Canada. Santa Claus posed for this picture when he was inspecting the engine so that all the boys and girls, and grown-ups, too, could be sure that he would reach them on Christmas Eve.

LOCAL NEWS.

His many friends were pleased to see Mr. J. F. Clarke, returned to town on Tuesday after a spell in an Edmonton hospital. Miss Mary Schellenberger and Mr. Sam Zucht returned the same day.

Mr. and Mrs. Wm. Kelly were guests on Christmas at the home of Mr. and Mrs. Baerlein, Spruce Grove.

Mr. Louis Ulmer is leaving shortly on a trip to Oregon.

Emil Miller returns this week to Detroit. Hy Miller Jr. is thinking of going back with him.

Charles Schulz, Vegreville, was in town Saturday.

Mr. J. Messenger returned to Stony on Saturday.

Bank Manager Larue went to Calgary for the holiday.

Arne Graulen leaves this week for Calgary, to accept a position with a construction company.

Mr. and Mrs. Val Mohr had as guests at their home this week, Mr. and Mrs. Garr of Edmonton; Mr. and Mrs. Paul Mohr, Lamont; Miss Millie Mohr, Los Angeles; Mrs. John Faltis, Lussland; Val Mohr Jr., Edmonton.

Mr. and Mrs. S. H. Meyer, Alameda, Sask., are visiting here with Mr. and Mrs. M. S. Meyer.

Mr. Geo. Wolf is expected home next week from the hospital.

Mr. Henry has returned to his duties at the local station after a nine weeks' visit in Duluth. His family returned with him. Mr. Smith, his relieving man, has gone to Edmonton.

Mr. S. G. Simmons is being promoted to the Montreal Bank branch at Mundare.

Buy your fresh chocolates at the Drug Store.

Mr. F. M. Ulmer has gone to Portland, Ore., on a visit.

Mrs. D. M. Barker returned on Friday last from Jasper, where she had been visiting Mr. and Mrs. Leslie Barker.

At Jasper, Nov. 28, to the wife of Mr. Leslie Barker a daughter, Hazel Allierne.

At Wabamun, on Monday, Dec. 17, to the wife of Mr. R. Kufflick a daughter.

In Stony Plain, on Dec. 19, to the wife of Harry Freese, Edmonton Beach, twins, still born.

The local school re-opens on Thursday, Jan. 3.

A boxing entertainment is being planned, to be held in Stony on Friday, next, Dec. 28th.

Butcher Horn had quite a stand among his meat selections for the Xmas trade.

The local bankers had a busy time Tuesday evening, amputating their patrons' Christmas whiskers.

Choice box candies, at all prices, at the Drug Store.

GET IT at HARDWICK'S.

A Greeting of
Hearty Good Will and
Best Wishes for
the Coming Year.

Get It at HARDWICK'S.

New Year, 1924.

We take this opportunity of
extending the Season's Greet-
ings to Our Many Patrons
and Friends.

STONY PLAIN, ALBERTA.

GET IT AT—

KELLY'S

Wishing our Patrons and
Friends a Bright and Pros-
perous New Year.

Reception to Two Sports.

On the eve of their departure from town, a number of the friends of Messrs. Henry Miller Jr. and S. G. Simmons met last evening and gave a reception in their honor, at which a large number were present from two town and district. General regret is felt at the departure from Stony of these two estimable young gentlemen, having both taken quite an interest in local sporting matters. The good wishes of all accompany them in their new field of endeavor.

Stock Taking Time

With the passing of the year and the advent of another it is customary in the business world to "take stock." The books are closed and balanced, inventories taken, bad debts written off, assets and liabilities clearly established and analyzed, and profits and losses on the year's transactions ascertained. The estate business man examines his yearly statement with great care, sets up his mistakes and notes where his judgment was sound and good. If he finds there have been leaks, he proceeds to stop them; if his inventories show him to be carrying a lot of dead stock, he devises methods to get rid of it; if certain departments have been operated at a loss, he seeks the cause and a remedy; if other departments have proven quite satisfactory and profitable, he studies means of further strengthening and extending them.

All men having even the most rudimentary knowledge of business and a desire to succeed "take stock" at least once a year, and many do so much more frequently. But how many men, and women, take stock of their progress in life apart from those things affecting their material welfare?

How many people, for example, at the close of 1923 will carefully and seriously and with downright honesty make up a complete balance sheet of their life during the past twelve months, enumerating assets accumulated and liabilities incurred, dead stock with which they are still encumbered, losses they have sustained, gains they have made?

During the year did the State do more for you than you, as a citizen, rendered to the State? If so your liabilities have been increased because you owe a debt to your country that you have not discharged. True patriotism and real citizenship means service to one's country, not in selfishly accepting all the advantages which Canada gives to its people and giving little or nothing in return.

What assets in the form of better education, wider knowledge, increased appreciation of the beauties in art and nature, gains from the untold wealth in the storehouse of literature have you accumulated and developed? Or have you in a blind ambition about money matters added "just opportunities" to your other liabilities?

And at the closing of the year are you enjoying better physical health, with a clearer mind and a stronger body than when the year first dawned? If you are, you have developed a real asset, one that will give added power, effectiveness and efficiency to all your endeavors. But if you have allowed a whole twelve months to slip away without giving thought to your health and physical well-being you have incurred a liability which will handicap your best efforts in future years. The rules of health are simple, and if generally adhered to would close most of the hospitals and put scores of doctors out of business.

And what of the "stock" which a personal inventory would reveal as being carried over into the new year? Is it a stock of old prejudices die-hard, being carried over into the new year? Is it a stock of old friendships, alienating you from those who might be friends, alienating your sympathy and understanding from them, and theirs from you, the while embittering the lives of both? Is it a stock of bad habits which hampered your work and career in the past and are still clogging your progress? Is it a stock of petty rivalries and enmities having had their birth in some trivial matter but which have succeeded in warping your outlook on life? Better take a sharp look at your present inventory of "dead stock" on hand, and get rid of it like a good business man.

And of what does the profits and losses account of your life for the year 1923 consist? Is the balance on the right side in helpful service to your own community, in kindly thoughts and actions for others, in lulling suspicions, smoothing away difficulties, making friends, rather than enemies, and generally raising the tone and promoting the welfare of the community?

While taking annual stock of material things, which may not in these rather trying times and difficult period in the world's history prove an altogether satisfactory occupation, albeit a necessary one, take stock also of these other and very vital things which go to round out life. Such a stock taking may give great satisfaction regardless of economic conditions and worries, but if such satisfaction is not experienced, then the year's work has been a failure no matter how greatly your bank balance has been increased.

Bar to Radio Waves

Experiments Prove They Are Absorbed By Magnetic Iron

Experiments have proved that either daylight tends to dissipate radio waves or causes the earth's crust, or some other undefined natural phenomena to absorb them, the Aerial League of America announced.

The experiments were conducted by the league with the aid of the American Radio Relay League in a world-wide "check up." The prime object was to discover the mysterious phenomena which prevented, during the five weeks of Arctic daylight, radio communication with the Howden, the ship of Donald MacMillan, Arctic explorer, which is frozen in the Arctic ice north of Etah, Greenland.

After the Arctic daylight period had passed the station at Prince Rupert, B.C., 5,400 miles away, communicated with the Howden.

The most tangible solution to the mystery, it was said, "seems to lie in the magnetic band that covers a large area of the southerly part of Greenland and magnetic iron in the state of New York and Canada."

Green Feed for Poultry in Winter

Is Necessary to Keep Fowl in Perfect Order for Egg Production

It is of the greatest importance that the digestive organs of fowls be kept in perfect order if high egg production is to be obtained, and green feed is some form will supply the desired regulator. This fact is emphasized by the poultry authorities of the Dominion Experimental Farms, who point out that in order to make provision for the winter months, supply of cabbage, mangels, or sugar beets should be stored in the root cellar or pit. These should be crisp and firm at the time of feeding. The regular supply of green feed about nine a.m. daily is also suggested, as the birds will look forward to this particular kind of feed at some exact time of the day. While mangels or sugar beets are excellent forms of green feed for winter feeding of laying fowls, cabbage is one of the best green feeds and should be fed whenever possible. Sprouted oats make a good substitute for the roots and well cured alfalfa leaves or clover leaves are valuable for this purpose.

"I Had Terrible Backache From Kidney Disease"

Mrs. M. A. McNeill, Canadian Sta., N.B., writes:

"I was troubled for years with terrible backache, resulting from kidney disease. At times in each month I remained in bed, the pain was more than I could stand, and to walk was almost impossible! I used about \$50.00 worth of other medicines, but with little result. Now I am completely better, after using only five boxes of Dr. Chase's Kidney-Liver Pills.

Dr. Chase's Kidney-Liver Pills

One pill a dose, 35c a box. All dealers, or Edmondson, Station & Co., Ltd., Toronto

History Of Statuette

Premier Polaire of France Has A Souvenir Said to Possess Sinister Influence

Premier Polaire of France is the possessor of a "hoodoo" statuette, but thus far, at least, has weathered its sinister influence. It was brought from India by Gustave Lebon, a scientist, who was sent there by Sadio Carnot when the latter was a member of the ministry. "M. Carnot, looking over the collection of curios Lebon brought back, was asked by the select committee to choose a souvenir from the lot. He chose the statuette, whereupon Lebon urged him to take something else, as, according to Hindoo superstition, the statuette was a "hoodoo."

"Whoever it will do or be assassinated after reaching the highest office in his country," Lebon said. Nevertheless M. Carnot took it. He was elected president a few months later, and was assassinated on June 24, 1894.

Mme. Carnot, by a colic to her will, instructed the family to get rid of it, and it came into the hands of M. Polaire. He went through the presidency unharmed, but as he is still in high office the secret service men charged with his protection with earnestly that someone would steal the curio or that it will disappear in some other manner.

Painful Sprains, Bruises Restored By Nerviline

There is something power in Nerviline that has made it famous for nearly twenty years past. It sinks in deeply, it penetrates quickly, it takes away the pain from a sprain and brings grateful relief to bruised, aching muscles. If your joints are stiff and you are suffering from Rheumatism or Lumbago, if Neuralgia bothers you now and again, use this truly old "Nerviline." It works wonders, whether the pain is internal or external. Get a large 25 cent bottle from your dealer to-day.

Voluntary Wheat Organizations

Manitoba Government Preparing Legislation to Encourage Marketing Plan

As a result of the recent caucus of provincial government supporters held in Winnipeg, the government is preparing legislation to encourage the establishment of a voluntary wheat marketing organization, according to a member of the cabinet. Some of the members of the caucus were in favor of a compulsory wheat board, similar to that rejected at the last session of the legislature, being brought down again, but opposition to the compulsory feature developed. While no decision has been reached yet, the feeling at the recent gathering was that a private member should bring the bill before the house rather than a member of the government—Free Press.

CHILDHOOD CONSTIPATION

Constipated children can find prompt relief through the use of Baby's Own Tablets. The Tablets are a mild but thorough laxative which never fail to regulate the bowels and stomach, thus driving out constipation and indigestion; colds and simple fevers. Concerning them, Mrs. Gaspari Dalzio, Dainin, Que., writes: "Baby's Own Tablets have been of great benefit to my little boy, who was suffering from constipation and indigestion. They quickly relieved him and now he is the best of health." The Tablets are sold by medicine dealers or by mail at 25 cts. per box from Dr. J. C. Williams' Medicine Co., Brockville, Ont.

Cattle Trade With Britain

Canadian Cattle Will Have to Go Some to Get British Trade

An English market letter to the Ontario Dept. of Agriculture, under date of London, Dec. 1, says that the cattle business is in a very unhappy state just now owing to the wide spread prevalence of foot and mouth disease. The movement of cattle is prohibited in many districts, and many valuable herds have been destroyed.

During the first ten months of the year no fewer than 226,292 cattle were imported into Great Britain from the Irish Free State. In the same period Canada sent 38,246 cattle. These figures will give Canadian readers some idea of the enormous development which will have to take place in the Canadian cattle trade before Canadian cattle can capture the British market.

Minard's Liniment Relieves Pain

Order Your Farm Help Now

IN VIEW of the great demand for farm help existing in Canada, the Canadian Pacific Railway will continue its Farm Help Service during 1924 and will enlarge its scope to include women domestics and boys.

THE COMPANY is in touch with large numbers of good farm laborers in Great Britain, Norway, Sweden, Denmark, France, Holland, Switzerland and other European countries and through its widespread organization can promptly fill applications for help received from Canadian farmers.

In order to have the help reach Canada in time for the Spring operations farmers needing help should arrange to get their applications in early, the earlier the better, as naturally those applications which are received earlier will receive first attention.

Blank application forms and full information regarding the service may be obtained from any C.P.R. agent or from any of the officials listed below. THIS SERVICE IS ENTIRELY FREE OF CHARGE.

THE CANADIAN PACIFIC RAILWAY COMPANY

Department of Colonization and Development
WINNIPEG—M. E. Thornton, Superintendent of Colonization
T. A. Ashcroft, General Agricultural Agent
SASKATOON—W. J. Gower, Land Agent
CALGARY—T. C. F. Mercer, Agent to Sup't. of Colonization
MONTREAL—J. D. Gosselin, General Agricultural Agent
C. La Barre, Land Agent
E. G. WHITE, Assistant Commissioner.
Z. S. DENNIS, Chief Commissioner.

Many Animals Slaughtered

Outbreak of Foot and Mouth Disease Causes Great Loss in Britain

Altogether there have been 1,245 outbreaks of foot and mouth disease among animals in the United Kingdom so far reported to the government, according to the Board of Agriculture. The government has paid \$12,160 compensation to farmers for animals destroyed because of the epidemic, but against this it is estimated there will be \$234,000 received from the salvage of healthy carcasses from the animals killed.

To date there have been 41,153 cattle slaughtered, 20,011 sheep, 22,125 pigs and 34 goats.

No More Asthma. Dr. J. D. Kelle's Asthma Remedy sounds like a miracle. It stops the awful choking and painful breathing. It guards against night attacks and restores the ability to sleep and rest the whole night. Much is claimed for this remedy, but nothing but what can be demonstrated by a trial. If you suffer from asthma try it and convince yourself of its great value.

Returns From Baffin Land

Mounted Police Establish Three New Posts In Far North

The Dominion Government has established three more Royal Canadian Mounted Police posts in the north, according to Capt. H. T. Munn, a pioneer of Manitoba, who has just returned to Winnipeg from Baffin's Land. The most northerly of the new posts is located at Ellesmere Land, about latitude 76N. Other posts in this region will probably be located west of Pond's Inlet, along Lancaster Sound, and at Lake Harbor, Hudson Straits. Capt. Munn has been trading with the natives of Foul Bay, Baffin's Land and Cumberland Gulf since 1912, and has returned to Winnipeg after turning over his two trading stations at these points to the Hudson's Bay Company, which purchased them, together with all furs on hand and his 150-ton auxiliary schooner, for approximately \$60,000. He stated the fur crop was fairly satisfactory this year, the total value of the furs being about 4,000 fozes, valued at \$125,000.

For Frost Bites and Chiblines—Chiblines come from undue exposure to wind and cold and frost-bites from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thoms' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Divers Use Remarkable Invention

One of the most remarkable inventions used by divers now is the oxytorch; by means of which metal can actually be burnt under water. It seems almost incredible to think of heating iron to the melting point when it is surrounded by water, but the flame of the torch is encircled by a cylindrical jet of air that blows the water away. The heat is very intense and highly localized, and as a result the temperature is raised enough to heat through the iron and steel.

Good Propaganda

British Harvester Tells of His Experience in Western Canada

In a recent issue of the Canada Magazine one of the young men who came out from England to work in the western harvest fields gives his experiences. His story ought to be good propaganda among ambitious young Britons out of employment at home.

"This young writer does not attempt to gloss over the difficulties that are to be encountered when the green, city-bred youth from England enters the role of the hired man on a Western Canadian farm. He refers to the dreadful tortures of aching muscles that are the outcome of the first week's experiments at farm labor but he also points out that the majority of the western farmers who engaged inexperienced help were sympathetic and made the tasks as light as possible at the beginning, so that the recruit had a chance to become seasoned."

The writer of the story recommends the western farm to all young men in the world who are not slackers at all. He informs them that they will find the experience one of the most beneficial from the standpoint of health that they have ever had and that at the end of three months of harvest work they will be about \$250 in cash with which to either return home or to look around for another job. He warns them, however, to take stock of themselves before they come to Canada. It is a first-class place for real men. If they cannot measure up to the qualifications they had better remain in Great Britain.

Miller's Worm Powders will clear the stomach and bowels of worms, so that the child will no more be troubled by their ravages. The powders are sweet to the taste and no child will object to taking them. They are non-injurious in their composition, and while in some cases they may cause vomiting, that must not be taken as a sign that they are nauseating, but as an indication of their effective work.

G. N. Express in Great Britain

Mr. Fred Salter, foreign traffic manager of the Canadian National Express Company, who passed through Winnipeg recently, reports rapid growth in express traffic between Canada and the Old Country, and improvement in the rate of exchange will greatly increase business, he said. Mr. Salter was accompanied on his trip through the west by Mr. H. G. Ward, of London, England, European agent of the Canadian National Express Company.

HOARSE

Gargle several times a day with Minard's in water. It cuts the fungus and gives relief.

MINARD'S

LINIMENT

W. N. U. 1064

Rust-Resisting Wheat Varieties Will Be Developed Soon As Result of Experimental Work

That rust has caused a loss of \$25,000,000 this year on the "farmers" of Manitoba, and that in eight years' time experiments, which are being carried on with the hybridization of wheat varieties would result in the development of a variety that would be absolutely rust resistant, were statements made by experts of the Manitoba Agricultural College before the Royal Grain Inquiry Commission. The experts were Prof. G. R. Bieby, plant pathologist, and Prof. W. G. D. Wilson, cerealist.

Dr. Bieby said rust was caused by fungus and not by weather as many people believed. It caused a considerable reduction in the grade as well as the yield.

Rust, said Dr. Bieby, has been known since Biblical times. The attacks had not been so serious previously in Manitoba as they had been recently. In England rust had caused trouble at times but in the last few years it had been experienced.

Dr. Bieby stated that the removal of barberry bushes would be a factor in the eradication of rust, which, he said, could be spread by wind. The fungus had come to Manitoba either through being blown in from the south or from barberry bushes in existence in the province. When barberry bushes were removed from the spring wheat areas there would be less rust, witness declared.

Asked what was the best remedy in the Canadian west, Dr. Bieby answered: "The remedy will be found before long in the production of a variety of wheat which is resistant to rust."

Dr. Bieby said the weather was a factor in developing rust. In warm, damp weather, it developed more rapidly and it was that fact that gave the people the idea that weather was the cause of rust. It was a fungus, however, and the plant developed quickly in a high temperature.

Prof. Weiner spoke of experiments in the hybridization of wheat varieties.

Prof. Weiner said that varieties with excellent rust-resisting qualities had been developed already in Durums. The problem now was to transfer the rust-resisting qualities of Durum wheat to Marquis. There was every prospect of the problem being solved, he said. In Minnesota the rust-resisting qualities of Durum had been transferred to Marquis, wheat, and a type is being developed which, while showing rust-resisting qualities, preserved the characteristics of Marquis.

Asked how long it would take to develop a type of wheat that would be absolutely rust-resistant, Prof. Weiner declared that, in view of the volume of experimental work being done by universities in spring wheat areas to the south and in Canada, it was possible that in three or five years a wheat would be developed that would be highly rust-resistant.

Want Own Agricultural Products

Good Market in Great Britain For Canadian Produce

Canadian agricultural products will in future command more and more the attention of the British consumer, Dr. J. H. Grisdale, deputy minister of agriculture, of Ottawa, told the convention of the Western Canada Livestock Show at Victoria.

"Canada is quite widely giving more attention to the requirements of the British consumer than in any other of the Dominions," speaking in a general way, said Dr. Grisdale. "We must not, however, hesitate in our efforts for a moment if we would hold our place and improve the same in these British markets. The British consumer likes what he likes regardless of who will furnish it to him, and any failing of in quantity or quality very quickly reacts upon the source affected."

Japan Emigrants For Brazil
Before the earthquake the Japanese Government had allotted \$100,000 to the "Social Affairs Bureau" to encourage Japanese emigrants to go to Brazil. Many times 100 local intelligence offices in different parts of Japan promoted the movement.

N. N. U. 1004

Corn Growing in Manitoba

Cultivation Has Practically Banished Rust from Southwest Section

On the possibility of corn growing in Saskatchewan were discussed at a recent meeting of the Royal Board of Trade when G. J. Watson and C. A. Cooke were authorized to appoint a committee to finance the donation of a trophy for the encouragement of Saskatchewan farmers in the cultivation of corn to be available at next year's show.

Gordon McLaren, of Pipestone, Man., declared corn had proved the salvation of Southwest Manitoba, and 89,000 acres had been sown to it during the present season. Where corn had been grown, weeds were becoming unknown and rust troubles had vanished.

Grain Trade With Britain

Canadian Wheat Can Be Shipped Via Own Routes

Dr. W. L. MacDougall, chairman of the Montreal Board of Harbor Commissioners, has returned after an extensive trip in Europe during which he investigated the trade situation with particular regard to the establishment of direct Canadian trade routes.

"I think by co-operation between the buyers in Europe and the shippers in Canada it would be possible to handle a very great percentage of Canadian wheat exclusively through Canadian ports," he said.

Great Britain, he said, can always be regarded as a steady customer and he was optimistic regarding Canadian trade relations with the mother country.

Youngest Immigrant

Eric Boulton, believed to be the youngest immigrant who ever reached Western Ontario mentioned, arrived from Scotland. He is three years old. The boy travelled across the Atlantic with a party of 66 Scottish girls coming to Canada as domestics and became the popular friend of everybody on board ship.

French Airplanes Brought Down On German Territory By New and Mysterious Agency

Britain Wants Breeding Stock

Would Import Heifers From Canada Under Government Certificate

Veterinary officials and representatives of public bodies and veterinary societies from all parts of the United Kingdom, together with representatives from Canada, Australia and South Africa, meeting at the Royal Sanitary Institute, passed a resolution declaring it desirable to allow the introduction of breeding heifers from Canada into Great Britain, subject to government certificates that they are free from tuberculosis.

One London cattle inspector, referring to the wholesale slaughter of cattle proceeding in England, as a result of the foot and mouth disease, said he was confident that if Canadian heifers were imported as a temporary measure, importation would be made permanent when farmers have realized the quality of the Canadian cattle.

Ukrainian Co-Operation

Will Assist Immigration Authorities in Bringing Farm Settlers to Canada

Resolutions pledging co-operation with the immigration authorities in bringing Ukrainian farm settlers to Canada; creating a central Ukrainian committee of Canada, which will state the general policy of Ukrainian farmers to go in for mixed farming, and established scholarships for Ukrainian girls, which will enable them to take up the study of domestic science, were passed at the first Ukrainian educational and economist congress held in Winnipeg recently. Ukrainians from all parts of Canada were in attendance.

Near the great German airbase at Fuenf, four miles from the city of Nuremberg, there are fields covered with networks of metal wire. Recently fourteen French airplanes, flying from Strasbourg toward Prague, have been forced to land in the vicinity of these fields, which extend directly across the main air line between Paris and Vienna. The planes have been instantly confiscated by the German authorities and the pilots have been arrested before they have had an opportunity of ascertaining the cause of the forced landings. One pilot, however, managed to discover that an inexplicable hole several inches wide had been burned in his aluminum oil tank, and that the lead solder of the gasoline feed pipes had been melted in some manner which he could not understand.

Periodic landings of this nature are still occurring in the vicinity of Fuenf every few days, and the uncertainty of these mishaps is causing great anxiety among the officials of the Franco-Romanian Air Service Corporation. It is rumored that French Secret Service agents are quietly investigating the circumstances of the accidents, for the probabilities of ordinary engine trouble and difficult air currents cannot explain these alarming mishaps.

Are the Germans using a secret ray to disable foreign aircraft? asked Ernest Brunette, in an article in the New York World. And could such a ray be used with still deadlier effect in different ways? Many scientists who have given their attention to these questions within the past few weeks seem inclined to answer them in the affirmative.

Not long ago a number of motor cars were brought to a dead stop on a lonely road near Nauen in the dead of night. Conflicting explanations of the incident have come from various official and non-official sources. It is the opinion of many experts, however, that all the circumstances of the affair point to the probability that the cars were put out of commission by a powerful wireless ray, whose exact nature was unknown, focussed against that particular section. One German technician who accompanied the night party in question has declared that what Nauen sent out that night was a directed beam having such characteristics and such power that it might be regarded as an entirely new form of wireless ray.

What is causing concern to Allied military experts is the present moment, however, is not merely the fact that a few commercial planes have been forced to the ground in Germany and lost, but the far more startling probability that those who possess a ray capable of destroying aerial machinery at considerable distances will eventually be able, if they should so desire, to destroy any kind of machinery, and at any distance. The mysterious new ray, if it really exists, may prove to be a destructive weapon of almost unlimited possibilities. On the other hand, if it is turned to useful and peaceful purposes it may solve the great problem of the transmission of power by radio.

Advocates Mixed Farming

Grain Expert Says No Danger for Some Time From Russian Export Competition

Investigating Canadian grain handling methods, T. B. Zapoleon, grain expert with the United States Tariff Commission, and Dr. H. Bruce Price, professor of marketing, Minnesota University, were in Winnipeg recently.

Mr. Zapoleon, an advocate of mixed farming, both for United States and Western Canada producers, declared the livestock industry must be built and other crops developed in order to put agriculture on a firm basis. He denied that Russian grain being shipped to world markets is threatening the export trade of Canada and the United States. Russia's marketing, so far, he described as a mere "trial in the bucket." Possibility of Russia reaching her pre-war output is very remote, and Canada has nothing to fear from this quarter for a considerable time, Mr. Zapoleon said.

Sunny Skies Have Strong Appeal

DEATHS OF BURDEN - JERUSALEM

Interest excited by the continued discovery of marvellous treasures at the Tomb of Tutankhamen is making Egypt the mecca of the winter traveler and from January to March the Nile will attract many hundreds of Canadians of all classes, who will contrive in some way to visit the land of the Pharaohs. The way of most Canadians, however, will be the way of the great steamships on winter cruises. That winter cruises carry an appeal beyond that of groups of individuals who possess the leisure and finances necessary to participate in them, is evidenced by the numerous and varied applications now being received by the Canadian Pacific from persons who

of their skill and accomplishments, for the purpose of adding to the comfort and the entertainment of the guests on shipboard.

The only positions on any of the Canadian Pacific Steamships which are to undertake winter cruises for which no application has been made is that of Commander and those of the navigation and engineering departments generally, but for all positions now established, and some new ones, there is a host of applicants.

The enterprising young man, "with brown hair and blue eyes," ready to fill the role of entertainer, was so anxious to forward his claims that he sent his application by special delivery, and thoughtfully enclosed the desire that advantage should be taken

necessary stamps, to the amount of twenty-three cents to ensure a reply by similar expeditious method.

A "podiatrist" made application for "cruise podiatrist," and a football coach suggested that he would be the proper man to supervise the swimming pool. One lady proposed to act as a mah-jong and bridge instructor, and a man offered to earn his passage as expert cocktail mixer. In the matter of entertainment there have been suggestions ranging from individual opera singers to twenty-piece orchestras, and from a Russian master, with a ballet of sixteen, to a full musical comedy troupe—all proving that the appeal of sunny skies and the southern seas is one not by any means ignored.

OPENING DOCTORS

CHAPTER EIGHTEEN

January and February went by quickly, with little to mark their passing but longer days and warmer sunshine. Two or three rather bad storms isolated us for a few days at a time, and once we realized with a shock that we had not gone for the mail for two weeks—indisputable evidence that we could exist with little assistance from the outside world.

I had one rather interesting experience when I kept the Severn children for a week, so that Gwen might go to Winnipeg for the convention of Soldier Settlers' wives. I was convinced that Gwen needed a complete change—the little was getting on her nerves, she told me, and she was getting on Jack's. I might have told her the children were of no use, or, or Jack might have kept them, but I wanted to test out a theory and I offered to take them for a week. My idea was that Jack and Gwen would appreciate the change, and the children more after a short separation.

I think I was right. A week of his own cooking had a salutary effect on Jack, I am sure, and Gwen came home so glad to see him that she was glad to find all new ideas that she was a different woman. She had talked with soldiers' wives who had been home in England, had been entertained in one of the nicest houses in Winnipeg, had gone to a lecture on Domestic Science and Penitentiary Management, and had brought home a few new patterns and a big box full of souvenirs.

Gwen I needed a bit of a change. I informed me innocently when she came to get the children. I do not so fed up with everything here sometimes. But if you're heard some of the women talk! I met a girl from home who is living with her mother, even in tree in sight, and her husband thought she should have stayed at home instead of running about and being crazy by herself. And her almost crazy with the loneliness, poor thing!

The twins and the Severn were wonderful time with the children. Gerald was four and Molly almost two, and, just between ourselves, they were a handful. Gerald is spoiled—he is a shame, for he is really a nice child—and Molly is the most beautiful little rogue I have ever seen in my private life. He is the most beautiful little rogue I have ever seen in my private life.

Our children and the Severns were quarrelled but once, and that was when Gerald slapped Rupert and Nicolas proceeded to give him a good beating. Molly came to Gerald's aid and when I reached the scene of the conflict I found Nicolas and Gerald both in tears. Rupert, trying to pacify them, and Molly calmly crying and waving the eye from Nicolas's favorite doll. Peace was restored eventually and a few minutes later when I was discovered on a chair by the kitchen table, flipping the blueing bag vigorously up and down in a pitcher of milk.

"Molly make pretty milk," she exclaimed, showing all three thumbs. I really missed the children when Gwen took them home. I think I must be rather like Mrs. Fenwick. The next experience that marks the winter was very different. For the best reason in the world Mrs. Fenwick had not been coming to see me as usual, but every week or so I made it a point to call on her. She was very well and very happy, while she was not the woman to talk about who she felt most deeply anyone could see that she was almost overcome with joy.

"I am not at all nervous," she told me once, "of course I know that my age is against me, but then I have always been strong and healthy and I know how to take care of myself." Mr. Fenwick did enough worrying for both—I am sorry now that I used to tell Murray it was good for him. He was kindness itself to his wife, no kind and thoughtful that I sometimes wondered if I had been mistaken in thinking that sentiment and little to do with their marriage. He must have been greatly worried about his business affairs, too—he had told Murray that two bad crops and the fire had almost "cleaned him out" and that he could not weather another such succession of calamities. It was only to be expected that while he undoubtedly shared his wife's joy he

Watch your child grow strong on
SCOTT'S EMULSION

most often have regretted his inability to do more for her. But she, I am sure, missed nothing, she was beyond all that.

It was early one Monday morning that I was sent for. One of Gagnon's men, who lived beyond the Fenwicks, called on his way to Spruce Creek with a message that Mrs. Fenwick was very ill, and that Mr. Fenwick wished me to come to her.

I could neither take the children with me nor leave them alone long enough for Murray to drive me over, so I took my snowshoes and followed the short-cut through the bush, a road that saved almost a mile. There was still a great deal of snow in the woods, though it was melting quickly in the open.

A very haggard and anxious man met me at the door.

"Thank God you have come!" he said as he gripped my hand.

And then I heard the tiny wail that once heard is never mistaken.

I found Mrs. Fenwick very weak, but very brave.

"I'll be quite all right in a few days," she said faintly, "but my poor baby—"

"Your baby he was, tiny and blue, and wrinkled like a little old man, with claw-like fingers that clutched at my very heart."

It was Mrs. Fenwick who told me what had happened, as we sat together in the kitchen after I had done what I could for Mrs. Fenwick and the baby.

He had gone to Spruce Creek on Saturday and during the late afternoon Mrs. Fenwick noticed that the two half-grown goats had broken loose and gone into the part of the stable which was reserved for the cows.

There was not a great deal that was strictly against orders for her to go near the stable but the goats were valuable young animals and she knew they might injure themselves by over-eating, so she went out and coaxed them back into their loose boxes.

When she closed the door, then, I suppose because she was tired and perhaps excited, she slipped on the ice.

She fell just outside the stable door, and when Mr. Fenwick came home after tea he found her very ill.

He did not dare to leave her alone long enough to go for help. The baby was born Sunday morning, two months too soon, and until I came on Monday the little family was alone.

There was not a great deal that I could do but Mrs. Fenwick seemed glad to have me, and Mr. Fenwick was grateful out of all proportion. He, poor man, blamed himself for the accident, just as if anyone can tell what his wife is likely to do on a spring day.

Mrs. Fenwick was wonderful. She never thought of herself, but she was the little son. And, so weak and ill that even speech was an effort, and that what I must do for him, I had never touched a new baby and so I was fearfully nervous, but I did as I could.

It was not long before I was able to sit up, and I was as warm and comfortable as she could be made.

"I am so glad you are a nurse," I said to Mrs. Fenwick, making conversation to cover my awkwardness rather than because I had any special interest in what I was saying.

"I love to do anything I can for you and your baby," she said, "but I am so ignorant—I'll be glad when Mrs. Murray comes. I told you that I was so glad when she came, didn't I?"

"I wish she had been your nearest neighbor, she is so capable and has so much experience of every sort."

Mrs. Fenwick shook her head and her eyes filled with tears.

"It was you I wanted," she said.

"Mrs. Murray's children are men and women, not that I don't like them, but I'm so ignorant—I'll be glad when Mrs. Murray comes. I told you that I was so glad when she came, didn't I?"

"I wish she had been your nearest neighbor, she is so capable and has so much experience of every sort."

Mrs. Fenwick shook her head and her eyes filled with tears.

"It was you I wanted," she said.

ASPRIN

Say "Bayer" and Insist!

BAIER
Genuine

Unless you see the name "Bayer" on the wrapper, you are not getting the genuine Bayer product proved safe by millions and prescribed by physicians over three-hundred years for Colds, Headache, Toothache, Earache, Rheumatism, Neuralgia, Pain, Fever.

"Accept 'Bayer Tablets of Aspirin' only." Each unopened package contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 50.

Aspirin is the trade mark registered in Canada of Bayer Manufacturing Company, Ltd., of Germany. While it is well known that Aspirin means Bayer manufacture, to assist public judgment, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

little one is far better off, poor lamb, if he had lived it would only have been to suffer, and it is a pity that he can't make these things out. Mr. Fenwick, but I'm sure you have no reason to be angry. And it is my opinion that, accident or no accident, the outcome would have been the same.

Dr. Martin had assured me that Mrs. Fenwick's condition was as good as could be expected, and that all that was necessary in her case was a moderately long convalescence. But after the sad little funeral was over she collapsed and seemed to lose all desire to regain her strength. For hours at a time she would lie staring into space, with an expression in her eyes that frightened me. Had I not known so well her physical and mental shock, I should have feared that she was losing her mind.

She seldom spoke, but she seemed to like me, and I stayed for three weeks. Mrs. Murray came every few days to give us a hand.

Restoring Ancient Relics

May Take Years to Restore Objects Found in King Tut's Tomb

It will require years to restore accurately for later archaeological study and public observation the relics found in the tomb of King Tutankhamen in the Egyptian Valley of the Kings, says the current bulletin of the Metropolitan Museum of Art of New York.

The extremely fragile condition of the aged cloths and vestments make impossible their repair or even handling. Three weeks were required to unpack one small box to enable experts to note the general appearance of its objects and the schemes of decorations placed with accuracy.

Wooden parts of the chariot buried with the king were in good condition, but the leather harness had become so decayed that it was necessary to reconstruct it with 50,000 beads which must be sewed one by one on a copy. Replicas of ancient sandals must be made and covered with gold tracings.

Dole Bad For Morals

General Bramwell Booth, in a preface to the annual report of the Salvation Army's Social Work, says: "I sometimes wonder if what is called 'the dole' is not almost, if not quite, a grave misfortune. I do not think it possible for the ordinary reader to become so thoroughly conversant with the mischievous influence on all alike springing from this evil thing."

WOULD RAISE RED FLAG OVER THE WHITE HOUSE

Washington.—Intercepted Soviet instructions from Ráda to the Workers' Party of America, outlining detailed plans for a proletarian revolution in the United States, to "raise the red flag over the White House," were made public by the statement in support of Secretary Hughes' refusal to enter into any negotiations with Soviet Russia.

The department's announcement said that the department of justice "has assured the state department of the authenticity of these instructions."

Part of the programme outlined provided for the organization among industrial workers in the United States of "fighting" units.

"The members of the fighting units, in addition to all other matters," the instructions said, "must, once a week, be given instruction in shooting and receive some instruction in pioneer work (sapper work)."

Summarizing the results to be obtained, the document said: "We are firmly convinced that work in the direction designed by us will give enormous results in the sense of preparing thousands of new propagandists, future leaders for the military future of the party, and faithful fighters during the social revolution."

Bandits Return to North Dakota

Blow Up Safe of First State Bank at Fort Yates

Fargo, N.D.—After leaving Western North Dakota untroubled for nearly three months, border band robbers returned and "blew the safe of a First State Bank at Fort Yates, United States headquarters of the Standing Rock Indian Reservation." The robbery was discovered when Cashier Jacobson came to open the bank.

The safe was completely demolished and the bank wrecked by the explosion. The bandits took \$500 in cash, two diamond rings and other valuables.

Prisoners in the county jail, who were the only persons in town to hear them, said the bandits drove up about 1 a.m. and drove south an hour later.

Helium Finds in Canada

May Be An Aid to British Lighter Than Air Machines

New York.—Small deposits of helium recently discovered in Canada may be an aid to British lighter-than-air flying, according to the Duke of Sutherland, under-secretary for aviation of Great Britain. The Duke, who arrived here on the Boregarnia, expressed the hope that further deposits of helium would be found in parts of the Empire, since development of lighter-than-air flying in Britain was hampered by the necessity for manufacturing gas for dirigibles.

Discussing British aviation generally, he said: "After the war we scrapped our aeroplanes. Now we are two years behind the rest of the world and must catch up. We want to know about methods of developing commercial aviation, especially to know if commercial aeroplanes in time of hostilities are to be used for war purposes or for national defence."

Soviet Troops Mutiny

Russian People Driven to Desperation By Ruthless Action of Food Taxer

Harbin.—A mutiny of Soviet Russian troops is reported from Vladivostok, Nikolai, and Khabarovsk. The mutinous Reds, the report says, are being assisted by partisans of the White, or anti-Soviet faction, in Siberia.

The populations of the cities named, are said to have been driven to desperation by the ruthless collection of food taxes, religious persecution and the harsh official Soviet regime.

Raisali Reported Dead

London.—The Daily Mail's (Fingleton's) correspondent sends the announcement of the death of the notorious Moorish chief, Raisali. It is suspected, according to this dispatch that Raisali was poisoned.

W. N. U. 1504

Big Silver Nugget For Empire Exhibition

Toronto.—With the object of interesting British and European capital in Ontario's mineral wealth, and attracting capital to the province, Hon. Charles McRae, provincial minister of mines, has arranged an Ontario mineral exhibit for the British Empire Exhibition, which he believes will be one of the finest of its kind ever presented. The government has purchased for exhibition purposes the Kelsey silver nugget, which weighs 8,400 pounds. There is \$17,000 worth of silver in the nugget and the government bought it just at its silver worth.

Demand Hundred Cents On the Dollar

Home Bank Depositors Put Responsibility to Federal Government

Toronto.—The slogan, "A hundred cents on the dollar," with the federal government responsible for the payment, was the keynote of a big gathering of depositors of the Home Bank which met here in an effort to impress upon the Dominion authorities the fact that they are quite serious in their demands for full return of all deposits.

The meeting passed a resolution along that line, asking the federal government assume responsibility for seeing that all the depositors receive the full hundred cents on the dollar, in view of the fact that on more than one occasion the condition of the Home Bank had been brought to the attention of the department of finance and that steps were not taken to see that proper precautions were provided.

W. T. H. Lee said he was not satisfied, as a depositor, with the Bank Act. "What we want," he continued, "is some system of government inspection whereby we will know where to place the responsibility. It is the business of the government to ascertain the solidity of all banks, and they cannot be relieved by the Bank Act as it exists at present."

Labor Government Is Probable

Considered that Liberals May Support Them in House for Short Period

London.—Herbert Asquith's speech at the Liberal Club, in which he said the party would form no alliance with other parties, is interpreted, by the newspaper, as meaning in effect, that the Liberals are determined to put a Labor Government in power at the earliest possible moment, after the preliminary business of the new parliament has been transacted, namely, about the third week in January.

The Liberals plan to support the Labor ministry so long as they judge it desirable to do so; then, newspapers think, they will turn it out and succeed to the administration themselves.

The Liberal papers comment editorially on this opening for the Laborites with patronizing condescension. The Daily News tells them "that if they abandon these elements in their programme which the country has rejected they have nothing to fear from the Laborites."

Seaplanes For Amundsen's Flight

Airships Built at Friederichshafen

Christiana.—Capt. Roald Amundsen, referring to his proposed Spitzbergen-Alaska flight, said that his expedition would have at least three seaplanes now being built at Friederichshafen, and which will be sent north as soon as possible. The start will be made some time between May and August of next year. The explorers will sail under the Norwegian flag. It is expected that the cost of the expedition will be approximately \$150,000.

Millions For Gould Children

New York.—Supreme Court Justice Davis has decided that each of the seven children of the late George J. Gould by his first wife was entitled to \$52,371.35 from the trust, established by Jay Gould, in his will, for the benefit of George J. Gould and his other children.

Canadian Marines May Serve On British Ship

Opportunity Presented to Royal Canadian Volunteer Reserve for Summer Training

Ottawa.—Members of the Royal Canadian Volunteer Reserve are to have an opportunity next summer to serve their period of training on British battle cruisers H.M.S. Hood and Repulse, together with four ships of the first light cruiser squadron which are to be in Vancouver next June in the course of their Empire tour. The British admiralty has just advised the Canadian Naval Volunteers who wish to do their voluntary service abroad can serve on the British battle cruisers. These volunteers will be embarked at Vancouver and will sail down through the Panama Canal and on to Eastern Canadian ports.

To Aid U.S. Wheat Growers

Washington.—Plans to aid wheat growers by granting government loans, which would permit them to purchase cattle and diversify their farming, were drafted into a bill by several members of the Senate and House from the Northwest. The bill would provide a \$50,000,000 fund. The loans would be for a five-year period, at a rate of interest not to exceed six per cent, and with the cattle as security.

Says Heavy Taxation Will Discourage Industry

Whitney—"I see nothing which can interfere with the rapid progress of the western provinces unless it be continued increase in taxation," said Grant Hall, vice-president of the Canadian Pacific Railway, who has returned to Winnipeg after a trip of inspection which took him as far as Vancouver and Victoria. "These increasing taxes," he added, "may be necessary on account of commitments undertaken in previous years, but they cannot but have a discouraging effect on industry."

Commends Reply to Soviets

Samuel Gompers Says Communists Are at War With Free Peoples

Washington.—The statement of Secretary Hughes rejecting Russian Soviet efforts to open negotiations with the United States Government, was commended by President Samuel Gompers, of the American Federation of Labor.

The Soviet organization in Russia, Mr. Gompers declared, is a "Communist machine" which "must remain at war with free peoples and free institutions as long as it lives."

"The Soviet government," the Russian Communist party, the Communist Internationale, the red labor Internationale, the various bureaus, commissions and organizations, are all one fabric," he added, "which actually exists to make war on American institutions and principles."

Afghans Cause Trouble

Wild Tribes Again Cause Concern to the British Government

London.—The turbulent Northwestern frontier of India is again causing apprehension to the British government, the result of strained relations with Afghanistan. Unless a satisfactory settlement is reached the British minister to Kabul will be withdrawn, it is declared.

For several weeks the British have been exerting pressure upon the Afghan Government in order to bring about the punishment of the fanatical bandits who are responsible for a series of murders of British officers and women at widely separated outposts along the frontier during the last year. Three of the victims have been women, and the public both in India and England is incensed against the outrages, which have gone unpunished.

KING OF GREECE HAS DEPARTED FOR ROUMANIA

Athens.—King George, in accordance with his note to the government that he would comply with its request to leave Greece, departed from the royal landing stage at Piræus in a naval launch to the Daphne, which will carry him and his party to Roumania.

The launch was in mid-afternoon when the harbor forts fired a royal salute. The King was accompanied by Queen Elizabeth, Captain Roussin, a palace aide, and a guard of picked marines. Only a small group of friends witnessed the departure of the monarch.

The official gazette issued a decree appointing Admiral Goundouriotis as regent. "The government has informed the diplomatic representatives that the departure of the King and Queen is only temporary, pending settlement by the constituent assembly of the question of the regime."

It is understood that a decree will be promulgated prescribing, as a formula for the deputies oath, "faith in and devotion to the interest of the country," instead of "devotion to the constitutional king" as heretofore.

No Modification of Sales Tax

Stated that Government Does Not Intend to Postpone New Import

Ottawa.—It is not serious of any intention upon the part of the government to suspend, or modify, the sales tax, Hon. Jacques Bureau, minister of customs and excise, said when asked about reports that the new import might not go into effect in its present form on January 1. "This department," said the minister, "is preparing to do its duty by collecting the tax. The new act was passed by Parliament, and it would appear that only Parliament could defer its enforcement."

Asked about complaints made by business men who protest that the tax will be discriminatory, the minister replied that taxes were always unpopular with most people, and that it was an easy matter to criticize and raise objections.

Mild Weather Stories

Reports From Different Parts Tell of Balmey Conditions

Port Arthur, Ont.—The snow has almost entirely disappeared. The bay is clear of ice, and navigation is as free as any day in midsummer. The new hockey arena has no ice and the skating rink has been closed.

Sudbury, Ont.—With butterflies in evidence and the slight snow that fell over the weekend rapidly disappearing, Sudburians are shuddering their winter overcoats, once more. The temperature at noon was 43 above with bright sunshine and getting warmer hourly.

Winnipeg.—C. H. Leeder of Winnipeg, reported he had just seen a flock of two wild geese flying northwards. The mild weather is supposed to be the cause of this phenomenon.

An International Question

Claim Made in U.S. That Canada Is Taking Too Much Water From Niagara River

Chicago.—The claim is made that the diversion of water from the Niagara River for power purposes on the Canadian side exceeds the amount permitted by the treaty with Canada by about 7,500 cubic feet per second, in a report made by engineers of the Chicago sanitary district.

The report states that the diversion of water is being made under the treaty of 1910, and that Canada was at that time permitted to divert 35,000 cubic feet a second, and the United States 20,000 cubic feet. The engineers claim that this difference was to take care of an additional diversion at Chicago up to 10,000 cubic feet, but that now Canada will not recognize this implied provision.

Paintings For National Gallery

Toronto.—Six of the paintings now on exhibition by the Royal Canadian Academy at the Grange Art Gallery have been purchased for the National Gallery at Ottawa. The paintings are all by Montreal and Toronto artists.

A MODERN SANTA CLAUS

THE world is getting so big and there are so many little folks and big folks in it who look forward to a visit from Santa Claus, all on the same day, that the genial old gentleman is forced by the pressure of his duties to discard his reindeer and his sleigh on occasions and to travel on the fast passenger trains that are speeding people home for Christmas Day. Nothing but the very best will do Santa Claus, and that

is why, as you see here, he has chosen as his steed one of the huge locomotives of the Canadian National Railways. These locomotives, known as the 6000 type, are the largest passenger locomotives in Canada. Santa Claus posed for this picture when he was inspecting the engine so that all the boys and girls, and grown-ups, too, could be sure that he would reach them on Christmas Eve.

CHRISTMAS AMID OLD HOMELAND SCENES

THE second Canadian National Railway train leaving Winnipeg for Halifax and special trains arranged by the Canadian National, which allowed them to leave Winnipeg as late as Decem-

ber 14 and yet reach Britain in time for Christmas. Inset is a group of Edmonton people aboard the second tourist special.

A Pioneer Pension System

The Canadian Pacific Railway in this year celebrating the twentieth anniversary of the foundation of the Company's system of pensions for the employees.

It was in 1902 that the Board of Directors, under the Presidency of Lord Sharncliffe, looked into the future for the benefit of those who were laying the foundations of the service that was to make as large a part in the up-building of Canada.

In December, 1902, the directors passed a resolution stating that a time had come when provision should be made for officers and permanent employees who, after long years of faithful service, had reached an age when they were unequal to the further performance of their duties, and announcing that a plan of superannuation had been determined upon.

The plan was a generous one. The Company provided all the money necessary, and the employees were not called upon to contribute to it in any way whatever. In 1903 when it was first put into effect Canadian Pacific employees numbered about 40,000. To-day they number 90,000, and every one of them, from the humblest stenographer, office boy, or "track walker" to the minor employee at some far-off outpost in China or in Europe, has old-age assistance guaranteed as he or she stays with the Company.

Some Statistics

The Company's first contribution to the pension fund was \$250,000 which was supplemented by annual grants starting at \$50,000, which have, from time to time, been increased, until for some years past it has been \$500,000 annually. At the end of 1922 the Company had contributed a total of \$4,715,000 to the fund while payments on pension allowances amounted to \$3,857,802, leaving a balance to the credit of the fund of \$857,202. In 1922 the total payments made amounted to \$508,061, and at October 31st of this year the total number of the Company's pensioners was 1,182, each of whom was drawing an average of \$95.92 per month. It is of interest to note that since the pension fund became operative, 87 pensioners have become inactive through the death of the beneficiaries.

Having in view conditions of increasing living costs which have prevailed the world over, the Company in 1919 allowed the pensioners an additional bonus of twenty-five per cent. of their regular allowance. This went into effect on May 1st of 1920, and was continued until the end of 1922. In view of the modification of the condition that made it necessary, that bonus is this year set at twenty per cent.

By far the greater part of this money is of course distributed in Canada, just as is the case with the Company's vast payroll of over \$100,000,000 annually, and the many millions it yearly spends on the purchase of supplies under the policy of distributing as much of its expenditure as is possible in the country it exists to serve.

The operation of the fund is simplicity itself. Upon reaching the age of 65 every employee who has joined the staff before reaching the age of forty is entitled to retirement if the Company so desires and can claim a pension of one per cent. of the average monthly pay received for the ten years preceding retirement for every year in which he has been in the Company's service. This is as the system was first devised twenty years ago, and there has been but one amendment to its provisions. In 1908 it was found that in some cases the amount of the pension so calculated was insufficient to protect the recipient against want as was intended, and it was provided that from thenceforth the minimum amount of pension paid would be \$20 per month.

Pension Efficiency
That this system has been a big factor in fostering the efficiency so largely identified with Canadian Pacific operation is undeniable. Mr. E. W. Beatty, President of the Company, speaks of it not only as a prime necessity in their days of sociological progress, and as an inherent right of those who give lives of faithful work to Canadian Pacific service, but also as one of the things that has helped to bring into existence the high standard of co-operation that exists between all branches of the Company's service. "It is helping to make contented employees," says Mr. Beatty, "and that is the first requisite of a faithful, efficient service."

WORLD HAPPENINGS BRIEFLY TOLD

It is understood that the date of opening of the British Empire Exhibition has been fixed for April 22, 1924, St. George's Day.

The number of unemployed persons in the United Kingdom has declined by 14,529, the total number now being 1,180,200.

The agreement between the powers as to the future status of Tangiers has been signed by the British, French and Spanish delegates. The plan maintains an "open door" policy at the Morocco port.

The Belgian Government, upon being sounded by Germany, has let it be known that Dr. Leopold Von Stouffer, now German charge d'affaires in Paris, would be acceptable to Belgium as German minister at Brussels.

The Prime Minister Mr. King, celebrated his eight birthday anniversary by doing a big day's work. Members and supporters of the Liberal Government remembered the day and a flood of congratulatory messages was received.

The Oliver Government would aid the establishment of an iron and steel industry in British Columbia by proposing that the federal government arrange for the payment of a bounty on pig-iron and similar products manufactured in the province.

A Chinese officer who has just obtained a pilot's certificate at the military school at Dusseldorf, near Zurich, has bought a number of light aeroplanes, on behalf of his government. It is understood China has decided to form an air fleet.

There are indications that discussion is likely to be renewed over the United States plan for utilizing an appropriation of \$500,000 for elevating the three gulf of United States battleships to give them equal range with the best foreign ships of the same class.

For Burns and Scudell, Dr. Thomas Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

Prince Writes Play

Prince William of Sweden, second son of King Gustaf V, who has made a reputation as a big game hunter, a poet, and a dramatic critic, is now also a full-fledged dramatist, his first play having been accepted for production by the Swedish Theatre in Stockholm.

W. N. U. 1094

Power From Waves

Harnessing Ocean's Tides and Waves Has Been the Dream of Inventors

Professor Macchetto, an Italian, declares that his recently invented model of a wave motor is adopted the problem of obtaining power from the waves of the ocean will be solved.

The extraction of power from the ocean's movements—waves—has long been the dream of inventors, as such a source of power is practically inexhaustible; but heretofore the models have, either been faulty or so expensive to operate as to be impractical. Professor Macchetto, however, claims that with his device he can generate ten-horsepower from each square yard of ocean surface used.

An interesting sidelight on the professor's invention is the fact that he has been refused aid by his own government and has announced his intention of offering his device to English capitalists when it is perfected.

Manslaughter in 2nd Degree

Using a razor—a bad stuff—but many people do it for their cars. The only remedy that is palatable and sure is Putnam's Corn Extractor, which does remove warts and cars, cleans them right off. Refuse a substitute for Putnam's. See everywhere.

Visitors Will Be Looked After

London Has Made Arrangements to Handle Empire Exhibition Crowd

Canadians who intend to visit the British Empire Exhibition next year are wondering already whether they will be able to secure public accommodation in London, and at that city. The Dominion Welfare Association has taken the matter in hand, and has established a central bureau to deal with enquiries regarding housing. A register of rooms available in central, suburban and outer London has been compiled while a special register has been opened for people who are willing to receive paying guests for this important year, or who are prepared to "fix up" their own houses to meet the demand for apartments.

End Stomach Misery

Gas On Indigestion

"Pape's Diapylin" is the quickest, safest relief for indigestion, gases, flatulence, heartburn, sourness, or stomach distress caused by acidity. A few tablets give almost immediate stomach relief. Correct your stomach and digestion now for a few cents. Drugists sell millions of packages of Pape's Diapylin.

Pioneer Editor Passes

James Hooper, King's Printer, Was Veteran Manitoba Newspaper Man

James Hooper, one of the pioneer newspapermen of Manitoba, died at his home in Winnipeg recently after some years of falling health. Mr. Hooper was born in Devonshire in 1855. He came to Canada in 1888 and for ten years he was employed on the "Herald" in London. He launched The Herald at Morris, Man., in 1893, this being one of the earliest newspapers in the province. He gathered news for the first issue of the Winnipeg Tribune, subsequently was employed on the Winnipeg Telegram as managing editor, and on the Winnipeg Free Press. In 1900, Mr. Hooper was appointed King's Printer for Manitoba, a post which he gave up several years ago. In his latter years he has done much as newspaper work and general writing as his health would permit.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother's Own Worm Expeller.

Restoring Rheims Cathedral

The Rheims Cooperative Society for the reconstruction of Rheims held a general meeting recently under the presidency of Marquis de Poligny. The Marquis, outlining the fourth year of the work of the society, said that 180,000,000 francs had been spent in Rheims during the present year and that, if the state was able to continue its aid in the work, the reconstruction of Rheims should be completed within five years.

Gymnastic exercises have been recommended by a German medical scientist for weak or fat babies six months old and over.

Minard's Lincture for Distempers

Is Your Nose Stuffed With Cold?

Don't load your stomach with cough medicine.

Send healing medication through the nostrils—send it into the passages that are inflamed with Catarrh.

It's easy to get rid of a bad cold, to drive out Catarrh, to strengthen a weak throat by inhaling today.

Catarrh is the cause of your drugstore today. By using it frequently you keep the air passages free from germs, and thereby prevent many a bad cold. Two months' treatment \$1.00; small size 50c. Refuse a substitute. Buy from The Catarrhizone Co., Montreal.

Coal By Way of Lakes

Great Lakes Route Is the cheapest method of transportation to the world, and utilization of it for bringing Alberta coal to this province appears feasible. Lower rates from Alberta to the head of the lakes could undoubtedly be obtained. The combined lake-and-rail route should be more than \$7 or \$8, which would allow Alberta coal to compete with American anthracite. At any rate, this is a commendation worth striving for.—Boxer Clifford Star.

Mother! Give Sick Child

"California Fig Syrup"

Harmless Laxative for a Bilious, Constipated Baby or Child

Consipated, bilious, feverish, or sick, colic babies and children—let us take genuine "California Fig Syrup." No other laxative regulates the bowels so nicely. The tender little stomach and bowels act with a creak and a snap, starts the liver and bowels acting without griping. Contains no narcotics or soothing drugs. Say "California" to your druggist and avoid counterfeit. Stand upon genuine "California Fig Syrup" which contains directions.

Prince of Prussia

The postulate that "once a Kaiser always a Kaiser," which William Hohenzollern, although he is a Kaiser without a crown, has been finally accepted by a Prussian ministerial decree which gives William the designation of "Prince of Prussia," on the ground that he was that when he was born. The title is the same for the ex-Crown Prince.

HEART WAS SO BAD HAD TO SIT UP IN BED

Mrs. O. E. Fitzgerald, 106 Ross St., St. Thomas, Ont., writes: "In the Fall of 1921, I was taken ill with my heart, but I did not pay much attention to it. I kept on with my household duties, but seemed to become more and more tired, and finally had to call in a doctor. He said I was all run-down and was a nervous wreck. I had a severe pain in my chest which would move over to my heart and it became so bad I could not lie down, as when I did I had such a smothering feeling I would have to get up in bed till it passed away."

I tried several remedies, but with no good results. Finally, I was induced to try Milburn's Heart and Nerve Pills. I took 2 boxes, and I am now as well as I was 30 years ago. I am now 65 years old."

Milburn's Heart and Nerve Pills are 50c a box at all druggists or dealers, or mailed direct on receipt of order to J. C. Milburn Co., Limited, Toronto, Ont.

The annual cost of owning and operating the 1,000 foot roller coaster in the United States is \$2,000,000,000, and the investment in this vehicle is \$10,000,000,000.

The 50000 inhabitants of Bermuda depend for their water supply upon the rain that falls on the tops of their cliff houses and flows into storage tanks.

SUNDAY SCHOOL LESSON

DECEMBER 28

THE WORLD FOR CHRIST

Devotional Reading—Titus 2: 11-14

GOLDEN TEXT—They shall abundantly enter the memory of thy goodness, and shall shine of thy righteousness.—Ps. 145: 7.

The Lesson Setting

When—From B. C. 2520 to A. D. 61. Where—Mesopotamia, Palestine, cities of Western Asia and Eastern Europe.

Who—Abram and family, Israelites, Old Testament writers, Jesus and His disciples, Jews, Gentiles, Samaritans, Paul and associates, Lydia and household and many converts.

What—The world for Christ.

Review Lesson

For the past four lessons have formed a series entirely original in religious education as it has been carried on in the Sunday School. In it the Bible has been presented as a missionary book, from cover to cover, the record of missionary activity from the days of Abraham through all the ages following. The thought of helplessness to the world has run like a golden thread throughout the series. We set it first in the promise given to Abraham in the Sunday School. In it the Bible has been presented as a missionary book, from cover to cover, the record of missionary activity from the days of Abraham through all the ages following. The thought of helplessness to the world has run like a golden thread throughout the series. We set it first in the promise given to Abraham in the Sunday School. In it the Bible has been presented as a missionary book, from cover to cover, the record of missionary activity from the days of Abraham through all the ages following. Stony Plain and District.

At the Methodist Church Sunday evening last a special Xmas song service was given in connection with the regular service.

Father Hughes held mid night mass on Christmas Eve at St. Joseph's Church, and held service Xmas morning in Stony.

Mr Hungarr, of the Northern Seed Co., has been doing quite a business here, securing grain from farmers in carload lots.

To avoid a clash of dates, the Holborn U.F.W.A. card party was held last evening, instead of Friday night. It was well patronised, and the prizes awarded seemed to meet with general favor.

Mr Denzy Maisenko has resumed his residence on the Osocoyz Ranch, Glory Hills, and will be "at home" to his friends on New Year's Day, from 2 to 5.

The annual Xmas tree and entertainment in Glory Hills Reformed Lutheran Church was held on Monday evening and proved to be a very successful.

Mr Herbert is giving a dance New Year's Eve at his ranch at Glory Hills.

While the boy and girl of Mr George Miller's family, of Glory Hills, were going to the entertainment at their school last week, their rig was run into by a neighbor's car, throwing the occupants out and causing the horses to run away. The axle of the car was broken, but none of the passengers were injured.

A Wells shipped a car of cattle last week to Edmonton stockyards, and T Fitzpatrick shipped in a car of stock today.

Lyle Barrie is now assistant at the Schineke Store at Duifield.

A special meeting of the ratepayers of Lucknow S. D. has been called for tomorrow (Friday) evening in the school house.

Let the children eat plenty of fruit now and bring digestion normal, thereby avoiding doctor bills. There are plenty of apples to be had at a very low price at Charles Ries's place on Second St.

Fresh Froud and Morgan chocolates, you can get only at the Drug Store.

I can provide you with a Life Assurance Policy to suit your particular needs. R. B. Brooks, local agent for The Sun Life Assurance Co.

The Children's Concert

The Children's Concert held the 14th inst. in Ducholke's Hall under the auspices of the Ladies Aid of the Methodist Church was an unqualified success, both in points of attendance and quality of program. The children had been trained by Mrs. Cavanaugh, Miss Henry and Mrs. Malloch and to them great credit is due for the finished performance of the young people. Following is the program:

"O Canada."
Chairman's Address.
Piano selection. Manly Donaldson.
Recitation. Marie Clarke.
Dance. "Little Shoemaker."
Recitation. Stella Rossell.
Boys' Chorus. Miss Henry's boys.
Recitation. Ralph Lory.
Dance. "I See You."
Duet. "Keys of Heaven." Edith Outway and Murray Wolf.
Piano selection. Queenie Donaldson.
Drill. Miss Henry's Girls.
Recitation. Frank McMillan.
Recitation. Anna Moyer.
Dance. "Giddy-Dee."
Recitation. Eric Russell.
Dance. "Black Nug."
National Anthem.

Following young ladies took part in the dances, Nora Brooks, Thelma McCabe, Nora Kowensky, Madeline and Maxine McCulla, Agnes Bishop, Grace Messenger, Evelyn McCabe, Bezie Dale, Anna Moyer, Edith Outway, Lydia Odenbaugh, Ruth Wright, E. Malloch.

Boys, Jack Clarke, Albert Oppertshamer, Ralph Lory, Harold Outway, Frank McMillan, Elmer Messenger.

Boys' Chorus—Lorne and Harold Outway, Giles Clarke, Gwynnie Davis, Geo. Gitzel, Frank McMillan, Eric Russell, E. Lory, Gus Werner, Alvin Willie.

Graminia Old Timer Dies.

Mr J. E. O'Gorman, an old timer of Graminia, passed away on Saturday last at an Edmonton Hospital. Deceased was in his 77th year, and is survived by three married daughters, and five sons, four of whom reside at Graminia. The funeral service was held yesterday in the St. Joseph's Church, Spruce Grove, by Rev. P. T. Hughes, internment taking place in Spruce Grove Cemetery. Deceased was well and favorably known in the district, and a large number assembled to pay their last respects.

Boxing Contests and

DANCE!

Ducholke's Hall,

FRIDAY, DEC. 28.

BART'S ORCHESTRA.

EVERYBODY WELCOME!

News of Comet.

The school entertainment at Comet last week was up to the normal standard of excellence for this school, and the program was greatly appreciated by the youthful of the youngsters' friends.

The feature of the evening was the excellent exhibition given by the exponents of the marly art, there being some four or five bonis put on.

The dance at the school-house Friday evening was a very pleasant affair, and a good time was enjoyed by everybody.

The local boxers are practicing every evening, preparing for the big event at Stony tomorrow night.

Mr Stockwell of Comet is spending the holidays at his home in Vermillion.
